

Name of Ted Talk or Documentary: \_\_\_\_\_

Author or Group: \_\_\_\_\_

1. Identify at least 5 facts about the topic from watching the Ted Talk or Documentary:

- ice sheets are melting way faster than before
- The pace of global warming is speeding up by years
- Weather will turn extreme in about 50 years
- We need ice to look at the past.
- You can find out things from decades ago through ice

2. Did you notice any bias or point of view expressed in the video?

No, the  
photographer  
actually didn't  
really believe in  
global at first.

3. What is your biggest takeaway? Why is this significant to you and your topic?

My biggest takeaway is the if we don't switch to renewable energy we are going to kill the earths ecosystems. This is significant because part of our topic is switching to affordable renewable energy.
